

Warren Black

www.complexus.com.au

Founder & Principal of Complexus

Warren is an Engineer, Risk Professional and Complex Systems' Thinker who has particular interest in understanding how the complexity sciences might offer a better means to controlling emergent risks within highly complex, operating environments.

Warren consults to industry on how to improve Governance, Risk & Assurance practices so that they may reflect not only the degree of investment at risk, but also the specific complexities in play.

Warren is currently engaged in a higher degree in research (PhD) program, whereby he is *Investigating a Systems Thinking Approach to managing Complex Risks*, at the Queensland University of Technology.
