

Arun Mehta

Senior Structurer, Innovative Risks Solutions
Swiss Re Corporate Solutions

Arun Mehta is a Senior Structure within the Innovative Risk Solutions team. He is based in Singapore since 2018 and has more than 10 years' experience in the insurance industry.

Arun began his career with FM Global in 2008 as a risk engineer in Australia, with primary responsibility focusing on risk management and identification for a number of industries which included food & beverage, retail and building products & materials. Arun joined Swiss Re Corporate Solutions in 2012, as a risk engineer before transitioning to underwriting in 2014 concentrating on large industrial risk within the mining and energy sectors.

During his tenure with Swiss Re Corporate Solutions, Arun has underwritten and serviced the insurance of many large and complex accounts from mines, power stations and renewable energy. With his technical background in risk identification and management he has also been instrumental in the origination and structuring of parametric risk solutions in the energy and non-energy space.

Arun holds a bachelor's degree in chemical engineering and a bachelor's degree in commerce from the University of Sydney in Australia.
